2012

The artistic variation on a theme of the classic upholstered chair. The eternal form of the bestselling product with a modern look.

The Su chair has typical proportions and untypical sewing. The novelty is a bouncy - unlike in all other chairs of this type - connection of the backrest and the seat. Under pressure the backrest leans back slightly, which gives the user a feeling of greater comfort.

The chair comes in two sizes: the low chairs (favored by the designers) and their high versions (preferred by the customers) and hockers.

The upholstery is available in many different colors and finishes, the legs are traditionally made from wood.
