

# PAXT

Paxt is a broad collection of bucket chairs designed by Piotr Kuchciński. While they are meant to be utterly classical, they show the author's trademark sensitivity and mindfulness focused on proportions, smooth lines and finishing details.

What makes these chairs special is an additional piece that increases the contact surface of the backrest. In addition to the added comfort, it can also be a highlight of the interior, because the fabric for that piece can be freely chosen to create a contrast with the main part of the chair. Both options (low and high) are additionally available in the Paxt soft version, characteristic for effortless creasing of the backrest fabric and a softer filling.

As many as 7 base options are available, thus allowing the user to choose a chair that perfectly matches their functional and aesthetic needs. Paxt is an all-purpose collection, designed for residential, office and public spaces alike.
