

Noti.Prism

Prism is a chair which immediately stands out with its unique geometric form. All edges on the seat are straight and form polygonal surfaces, with the overall effect resembling the cut on a precious stone. The impression is enhanced by the distinct stitching pattern with multiple crossing straight lines.

Prism is manufactured in foam injection moulding technology, which ensures superior quality and long-lasting use. The chair is available in versions with aluminium castors and on aluminium feet. Prism collection is equipped with a tilt and height adjustment mechanism in standard version. The version on the feet can be enhanced with a self-return mechanism.

Prism is a great choice mainly for commercial spaces such as offices, hotels or restaurants.
