| Opis techniczny | Meble                                                                                                                                                                                           |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Podstawa        | Konstrukcja stalowa z profili i blach, malowane proszkowo; kółka                                                                                                                                |
| Siedzisko       | Konstrukcja płytowa z ciętą pianką poliuretanową. Elementem nośnym jest rama ze sprężynami falistymi. Pianka poliuretanowa oraz kołderka: mieszanka pianki poliuretanowej i włókna silikonowego |
| Oparcie         | Konstrukcja płytowa pokryta pianką poliuretanową oraz kołderką: mieszanka frytki pianki poliuretanowej i włókna silikonowego                                                                    |
| Podłokietniki   | Konstrukcja płytowa pokryta pianką poliuretanową                                                                                                                                                |
| Panele wysokie  | Konstrukcja ramowa, filc wykazujący właściwości akustyczne, pianka poliuretanowa                                                                                                                |
| Wykończenie     | Tkanina, skóra                                                                                                                                                                                  |

| Opis techniczny                              | Akcesoria                                                                                                                                                                                |
|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Wieszak                                      | Stalowa konstrukcja malowana proszkowo.<br>Dwa elementy z klejonki dębowej                                                                                                               |
| Blat boczny                                  | Wykonany z klejonki dębowej, lakierowany.<br>Mocowany do stalowej konstrukcji                                                                                                            |
| Podłokietnik<br>wewnętrzny niski             | Konstrukcja płytowa pokryta pianką<br>poliuretanową                                                                                                                                      |
| Panel wewnętrzny<br>wysoki;<br>panel łączący | Konstrukcja ramowa, filc wykazujący<br>właściwości akustyczne, pianka poliuretanowa                                                                                                      |
| Stolik<br>wewnętrzny                         | Blat wykonany z klejonki dębowej, lakierowany.<br>Stelaż wykonany z profilu stalowego z blachami<br>mocującymi, malowane proszkowo                                                       |
| Mediaport                                    | Konstrukcja stalowa malowana proszkowo na<br>kolor czarny (RAL 9005), przykręcana od dołu<br>siedzisk. Gniazda w konfiguracji: 1x230V typ F,<br>1xUSB-C, przewód 1,25m w kolorze czarnym |
| Zawiesie tv                                  | Konstrukcja metalowa, malowana proszkowo,<br>kolor czarny                                                                                                                                |

Opis techniczny

Akcesoria

Informacje  
dodatkowe

Na siedziskach i oparciach ze względu na użycie kołderek mogą występować marszczenia tkanin/skór. Możliwość montowania mediaportu pod każdym siedziskiem, na środku
