2013

Sofa Queen is a new version of the sofa King, which is softer and lower. Queen is a modular sofa which can be freely extended by adding a corner or an ottoman (optionally with a bedclothes container), with a choice of armrests of different widths. The double module is also available with a bed mechanism which can convert the sofa to a comfortable full sized double bed. The sofa can be ordered with a comfortable rounded headrest. Together with the sofa the set offers armchairs and poufs. There is a possibility of choosing the density of the foam - according to preference a harder or softer version.
