

Le Monde designed by the Milanese designer Leonardo Talarico, is an innovation in the world of furniture. It is a modular sofa inspired by the ancient French contemporary benches, versatile in form and suitable for all environments, from cozy to modern ones.

The back of Le Monde consists of a superposition of pillows that create a graphical game of shapes and guarantee maximum comfort. Seats are connected asymmetrically. Their modularity allows you to compose any statements and constellations.

The sofa can be ordered in two versions – more massive, built down and lighter - on metal legs.

The customer has a choice of a variety of colors and textures of NOTI fabrics.
